### PROFESSIONAL EXPERIENCE

#### Front-End Developer, Danaboom

Nov 2022 – present | Tehran, Iran

As a dedicated and motivated Front-End Developer at Danaboom, I contributed to the development of cutting-edge web solutions that elevated user experiences and drove business growth. Joining as my first professional role in the industry, I leveraged my strong foundation in web development and rapidly evolving technological skills to deliver exceptional results.

##### Responsibilities and accomplishments:

- Developed a user-friendly panel using React and Inertia.js, allowing foreign applicants to apply to Iranian universities, resulting in a significant increase in application.
- Collaborated with cross-functional teams, including UX/UI designers and back-end developers, to ensure seamless integration and optimal performance of the application.
- Improved website speed and performance by optimizing images, and implementing caching techniques.
- Participated in code reviews, providing constructive feedback and ensuring adherence to best practices and coding standards.
- Proactively stayed up-to-date with the latest industry trends and emerging technologies, continuously expanding my skill set and bringing innovative ideas to the team.

My time at Danaboom not only allowed me to apply the theoretical knowledge gained during my learning phase but also ignited a passion for creating exceptional user experiences through well-crafted code and collaborative development practices. I am excited to carry forward the expertise I gained during my tenure as I continue to contribute to future projects and pursue excellence in the field of Front-End development.

### PROJECTS

#### Education School Website, Personal Project

An experimental project that I inspired by a Youtube tutorial, and in following up, I translated it into Persian and changed its layout to RTL using React with responsive design.

Technologies which I used:

- React
- React Router
- Styled-components

#### "My Restaurant", Landing Page | Personal Project

An experimental project for learning purposes which I designed and implemented inspired by multiple websites.

Technologies I used:

- React
- Styled-components

#### ECommerce Shop Project, Landing Page | Personal Project

This was a task that I was assigned to get done. At that time, It was challenging for me and made me learn so many things.

Technologies I used:

- React
- Style-components

### EDUCATION

**Bachelor / Computer Engineering,**  
*Amol University of Special Modern  
Technologies* 

Sep 2013 – Dec 2017 | Amol, Iran
